Projects

Chirography Documentation Using OCR in CNN
The project aims to create a robust and accurate Convolutional Neural Network (CNN) model for Optical Character Recognition (OCR) specifically tailored to decipher and transcribe handwritten chirography in order to automate documentation processes effectively.

Energy efficient teaching-learning -based optimization for the discrete routing problem in wireless sensor networks
The project aims to design and implement a novel teaching-learning-based optimization algorithm tailored for wireless sensor networks, with a primary focus on optimizing routing strategies to minimize energy consumption and prolong network lifetime.
